Title: Fan Noise Reduction

PRODUCT SERIES: FAN and QFAN

SPECIFIC MODELS: All

PURPOSE: Reduce Fan Noise when utilizing multiple fans

Fan noise can be reduced by wiring the fans in series. When fans are wired in series, as shown below, the fan noise will be reduced. Two fan cords are required, and must be cut and spliced using insulated crimp-on butt splices. Do not wire more than 2 fans in each series. **NOTE: This will yield only slightly more CFM than one fan, but will be quieter.**

IMPORTANT NOTE: All work must be done in accordance with all applicable electrical codes.
